

Claude API Fundamentals

Question 1

You want to send a request to Claude's API. What's the minimum information you must include?

- ☐ Only the API key and your question
- ☐ Just your message text
- ☒ API key, model name, messages, and max tokens
- ☐ Your name, email, and message

Question 2

You ask Claude "What is pizza?" and it answers. Then you ask "What toppings are popular?" but Claude doesn't understand what you're referring to. What's the problem?

- ☐ Your internet connection is slow
- ☐ Claude is broken
- ☐ You asked too quickly
- ☒ Claude doesn't remember previous messages

Question 3

When Claude processes your text, what's the first thing it does?

- ☐ Generates a response immediately
- ☐ Checks if it's appropriate content
- ☒ Breaks it into smaller chunks called tokens
- ☐ Translates it to another language

Question 4

Users complain your chat app feels slow because they wait 20 seconds staring at a loading spinner, then all the generated text appears at once. What can fix this?

- ☐ Asking shorter questions
- ☐ Using a faster internet connection
- ☒ Enabling response streaming
- ☐ Using a different web browser

Question 5

You're building a web app that talks to Claude. Where should you store your API key?

- ☐ In your mobile app that users install
- ☐ In a text file on the user's computer
- ☒ On your server that users can't access
- ☐ In your JavaScript code that users download

Question 6

You're building a math tutor bot. You want Claude to give hints instead of direct answers. What should you use?

- ☐ Setting a very low word limit
- ☐ Using all capital letters in your messages
- ☒ A system prompt explaining the tutor role
- ☐ Asking users to be more specific

Question 7

You want Claude to give very predictable, consistent answers for a factual Q&A app. What temperature setting should you use?

- ☐ Temperature doesn't matter for facts
- ☒ Low temperature (near 0.0)
- ☐ Medium temperature (around 0.5)
- ☐ High temperature (near 1.0)

Question 8

You're building an app that needs clean JSON from Claude with no extra text or formatting. How do you get just the raw JSON?

- ☐ Send the request multiple times and pick the best one
- ☐ Ask Claude very nicely to only return JSON
- ☒ Combine prefilled messages and stop sequences
- ☐ Use a very high temperature setting
