

Prompt Engineering

Question 1

You want Claude to create a workout plan. Which opening line works better?

- ☒ "Create a 30-minute workout plan for beginners"
- ☐ "Do you know anything about exercise?"
- ☐ "I was wondering about workouts and fitness stuff"
- ☐ "What kind of workout should I do?"

Question 2

Claude keeps missing sarcastic comments when analyzing social media posts. What's the best way to fix this?

- ☐ Ask it to guess when something might be sarcastic
- ☒ Provide examples showing sarcastic posts labeled as negative
- ☐ Tell it to "be more careful about sarcasm"
- ☐ Make the prompt longer with more instructions

Question 3

What is prompt engineering?

- ☐ Training AI models on new datasets
- ☒ Improving a prompt to get more reliable, higher-quality outputs
- ☐ Programming AI models from scratch using code
- ☐ Building the hardware infrastructure for AI systems

Question 4

"Providing sample input/output pairs to guide AI responses" describes which prompt engineering technique?

- ☐ Being clear and direct
- ☐ Iterative refinement
- ☐ XML structuring
- ☒ One-shot or multi-shot prompting

Question 5

What is the main purpose of using XML tags in prompts?

- ☐ To reduce the token count of prompts
- ☐ To increase the processing speed of AI models
- ☒ To add structure and clarity, especially when including large amounts of content
- ☐ To make prompts look more professional
