

Tool Use Basics

Question 1

How can you tell if Claude wants to make another tool call in a conversation?

- ☐ Check if the response contains the word "tool"
- ☐ Check if the response is longer than usual
- ☒ Look at the stop_reason field for "tool_use"
- ☐ Count the number of message blocks

Question 2

When Claude uses a tool, what type of message structure does it return?

- ☒ Multi-block messages with text and tool use blocks
- ☐ Simple text-only responses
- ☐ JSON data without any text
- ☐ Error messages only

Question 3

What is the main purpose of a JSON schema when working with Claude tools?

- ☐ To format the final response for users
- ☒ To tell Claude what arguments your function expects and how to use it
- ☐ To store the results of tool function calls
- ☐ To encrypt data between Claude and your server

Question 4

What problem does the batch tool solve?

- ☐ It makes tools run faster
- ☐ It translates tool results into different languages
- ☒ It reduces the number of back-and-forth communications when multiple tools are needed
- ☐ It automatically fixes errors in tool responses

Question 5

What is the correct sequence of steps in the tool use workflow?

- ☒ Initial Request → Tool Request → Data Retrieval → Final Response
- ☐ Tool Request → Initial Request → Final Response → Data Retrieval
- ☐ Final Response → Initial Request → Tool Request → Data Retrieval
- ☐ Data Retrieval → Tool Request → Initial Request → Final Response

Question 6

Claude can only access information from its training data by default. What allows Claude to get current, real-time information?

- ☐ Making educated guesses based on patterns
- ☐ Searching through its training data more carefully
- ☐ Asking the user to provide more details
- ☒ Using tools to access external information

Question 7

What makes Claude's built-in text editor and web search tools different from custom tools?

- ☒ Claude provides the schema, but you may still need to implement some functionality
- ☐ They require special API keys
- ☐ They only work with specific file types
- ☐ They cost more to use
