

What's next?

Congratulations on completing Claude 101! You've built a solid foundation for working with Claude effectively. Let's recap what you've learned and point you toward resources for continued growth.

What you've learned

Getting started with Claude

- Claude is an AI assistant built to be helpful, harmless, and honest—more than a chatbot, it's a thinking partner for complex work
- You can access Claude through web, desktop, and mobile apps, with your conversations syncing across devices
- Effective prompts set the stage (context), define the task (action), and specify rules (format and style)

Getting better results

- Projects create dedicated workspaces with persistent knowledge, custom instructions, and team collaboration
- Artifacts are standalone outputs like documents, code, diagrams, and interactive tools that Claude creates alongside your conversation
- Skills are instruction packages that teach Claude specialized workflows—including built-in document creation and custom skills you can create

Expanding Claude's reach

- Connectors link Claude to your tools (Google Workspace, Slack, Notion, and many more) so it can work with your actual data
- Enterprise Search provides a dedicated project for searching across your organization's knowledge sources
- Research mode conducts systematic, multi-source investigations that would take hours to do manually

Putting it all together

- Claude applies across roles—sales, marketing, finance, HR, legal, research, and beyond
- Beyond claude.ai, you can work with Claude through Claude Code, Slack, Excel, and Chrome

Additional resources

- [Claude Code in Action](#) – Free course on using Claude for development workflows
- [Introduction to Claude Cowork](#) – Free course on how to use Claude's desktop companion for multi-step work
- [Connector Directory](#) – Browse and connect your tools

A word of encouragement

The most important thing you can do now is just get started! The skills you've learned here will sharpen with practice, and you'll develop intuition for when and how Claude can help.

Start simple. Pick one recurring task from your work this week and try it with Claude. Maybe it's drafting an email, summarizing meeting notes, or analyzing a spreadsheet. See what happens. Iterate. Learn what works for your specific needs.

Remember: Claude is designed to be a collaborator, not a replacement. The best results come when you bring your expertise, context, and judgment to the conversation.

You now have the foundation. The rest comes from doing the work.
